

# Climate Change and Health in Europe: Knowledge development and sharing efforts

**1 November 2021**  
8:15-9:15 GMT  
(9:15-10:15 CET)

**EU Pavillion**  
at the COP26  
in Glasgow

Tackling climate change impacts on health requires solid knowledge and evidence-based, equity-oriented solutions in both adaptation and mitigation.

We showcase findings of key recent research projects on heat impacts on health; present the EU knowledge-sharing platform — the **European Climate and Health Observatory**; and discuss sharing knowledge with EU's neighbours and across policy fields.
